

Health Care Project Receives Continued Support for Year Two

In December 2008, The Arc received great news. A renewal grant from the Community Foundation of Western Massachusetts was awarded to support the Project.

Thanks to the continued and increased funding from the Foundation, the Project Team will disseminate the health care report to and implement policy change activities with members of the Pioneer Valley. As a result, The Arc will gain some region-specific input regarding the report's recommendations and build a grassroots coalition.

Year One Support

The Arc of Massachusetts' Health Care Project receives funding from the Community Foundation of Western Massachusetts! The Project Team members will complete one focus group with parents/guardians and community support professionals and one interview with a state legislator to gather health care experiences of adults with intellectual and developmental disabilities. The data will be gathered from and the focus will be on those who live/work in the Pioneer Valley.
